

Preparation/Homework (for student & teacher)

Lesson Objectives

Journal (beginning of class) &/or Discussion Prompt (prior to class) *I usually have students write for 5 minutes at the beginning of every class period in a journal by hand, the prompt always deals directly with what we will cover and discuss in class that day. It gets them writing and gives them something to say when we begin class discussion in class. However, these prompts could easily be combined or turned into Discussion Posts due before class as homework.
